

ORCA MASK INSTRUCTIONS

It is recommended that the whale masks be printed on white card stock.

If using the colorable mask, it is recommended that it be colored in before it is cut out. The pair of ovals should be used as eye holes and will need to be cut out as well.

Simply attach a dowel or craft-stick with tape or glue to the back side of the mask. Masks can simply be held to the face.

If children wish to wear the masks, use a utility knife to cut out the eyeholes and then staple ribbon to either side of the mask. Tie at the back of the head.
